

The GL Business Network: The Internet of Us

Our Panellists

Geoff White

Television News Journalist, Channel 4 News

Geoff is an award-winning television news journalist whose exclusives have covered everything from fraud in the internet dating industry to the world of cybercrime gangs. He is the co-creator of *The Secret Life of Your Mobile Phone* and for Channel 4 News he created the Data Baby project, a unique experiment which used a fictional online identity to expose how personal data is being used and abused online.

Ed Boal

Associate, Digital Media & Technology, Gregg Latchams

Specialising in technology and data privacy law, Ed advises tech companies of all sizes on how to navigate the regulatory framework when it comes to launching new digital products and services. He has a particular interest in Big Data, transatlantic data flows and data privacy issues relating to 'quantified self' and the Internet of Things.

Dr Glenn Parry

Associate Professor in Strategy & Operations Management, UWE

Glenn's expertise involves organisational transformation, business models and value creation. His research is currently focussed on the Digital Economy, where he is the co-investigator on the Hub of All things project funded by EPSRC – an Internet of Things data schema that aims to give control of personal data back to the individual.

Emily Taylor

Emily Taylor Internet Research

Emily has worked in the field of Internet Governance for 15 years and is an Associate Fellow of Chatham House. She is editor of the *Journal of Cyber Policy*, author of a number of renowned publications commissioned by governmental bodies and the biggest names in the internet industry and former Chair of the ICANN WHOIS Review Team and Director of Legal & Policy at .UK registry Nominet.
